ORCID & Its HKU Implementation

The problem

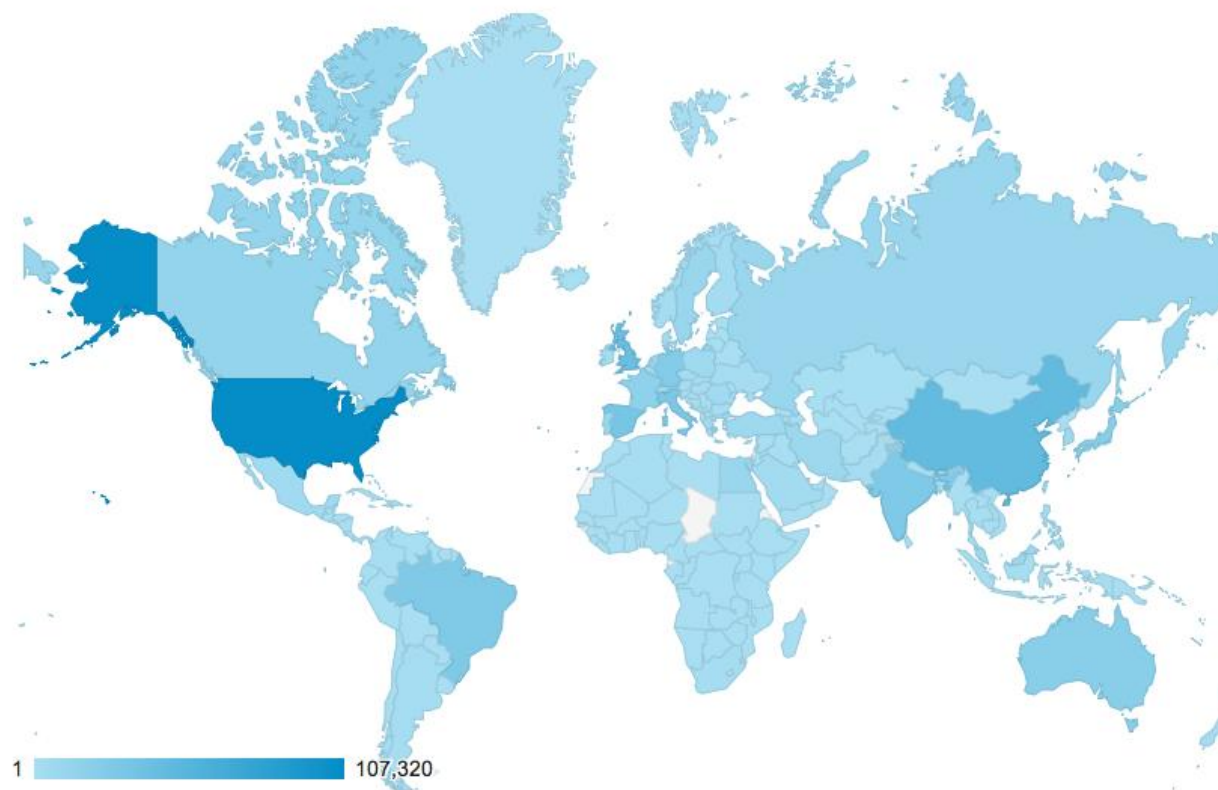

The research community has lacked the ability to link researchers with their professional activities.

As a researcher, you want to

- ✓ **ensure your work is discoverable** and **connected to you** throughout your career;
- ✓ **minimize the time** you spend entering repetitive data online; and
- ✓ **eliminate name ambiguity**, distinguishing you from other researchers and ensuring proper attribution.

How can ORCID help?

ORCID provides you a unique and persistent personal identifier that connects you and your research activities throughout your career.

Open, non-profit, community-driven organization

Website and registry localization for multiple languages in process

More than **280,000 iDs** issued to date

Registry use is **international**

Personal Information
Biography
Rebecca Bryant joined ORCID in April 2013 as Director of Community. In this role, she develops relationships, programs, and communications to support the understanding and integration of ORCID identifiers. Prior to joining ORCID, she served as Assistant Dean in the Graduate College at the University of Illinois where she led numerous initiatives, including the establishment of graduate career services, the creation of a postdoctoral affairs office, and the collaborative implementation of Electronic Theses and Dissertations (ETDs). Dr. Bryant earned a bachelor's degree at Butler University, a master's degree from the University of Cincinnati College-Conservatory of Music, and a PhD from the University of Illinois at Urbana-Champaign.

2. Connect your ORCID iD

IMPORT RESEARCH ACTIVITIES

ORCID has been working with many member organizations to make it easy to connect your ORCID iD, and import information from their records. Choose one of the imports wizards to get started.

Scopus to ORCID

Import your Identifier, profile and publications. The wizard helps you find the correct Scopus profile and to confirm your publications. You can then import the identifier and list of publications into ORCID. Any changes you make will be submitted to the Feedback team to update your Scopus profile.

CrossRef Metadata Search

Search CrossRef's comprehensive metadata on journal articles, conference proceedings and monographs. Easily add search results to your ORCID profile.

Don't see what you are looking for?

2. Connect your ORCID iD: search and add works

Search and Add Works

To add works click the Update link under the Works heading in your ORCID Record. Search and add is the default method and you should see a list of publications associated with your name in the left column of the Update Works window. The listed works are the search results of a CrossRef search on your name. To add a publication from this list to your profile just click on it. It will move to the Works in your ORCID record column on the right and you can save it by clicking Save changes in the bottom right corner. If you have already added works to your record, they will be listed in the right column.

2. Connect your ORCID iD: link to other identifiers

RESEARCHERID  THOMSON REUTERS

ORCID

Did you know you can associate your ORCID ID with your ResearcherID account?

☒ I would like to create an ORCID record. The Open Researcher and Contributor ID (ORCID, Inc.) is a non-profit organization that aims to solve the author/contributor name ambiguity problem in scholarly communication by creating a central registry of unique identifiers. These identifiers can be used within various systems you may interact with in your professional research workflow, including manuscript submission, etc.

☐ I already have an ORCID record. By creating an ORCID you will be able to link your ResearcherID account with this centralized registry. Learn more about [ORCID](#).

☐ No, thank you. If you choose not to get or associate an ORCID, you can do it at a later time.

New ORCID-integrated data citation tool

Posted May 13, 2013 by [Gudmundur Thorisson](#) & filed under [Uncategorized](#).

We are pleased to announce the beta launch of a new service for searching and claiming works in DataCite:

<http://datacite.labs.orcid-eu.org>

The tool enables users to search the [DataCite Metadata Store](#) for their works, and subsequently to add (or claim) those research outputs – including datasets, software, and other types – to their ORCID profile. This should increase the visibility of these research outputs, and will make it easier to use these data citations in applications that connect to the ORCID Registry – [ImpactStory](#) is one of several services already doing this.

The new service also provides formatted citations in several popular citation styles, supports COinS, links to related resources, and displays the attached

[Creative Commons license](#) where this information is available. In addition to datasets, the DataCite Metadata Store of course also contains many text documents from academic publishers and services such as [figshare](#) or [PeerJ](#)

Recent Posts

The University of Hong Kong ORCID Record Creation

In October 2013, The University will create ORCID records for HKU faculty that now have a HKU ResearcherPage in The HKU Scholars Hub – usually staff with UGC status of A ~ I, sometimes O. These faculty could choose to opt-out and no ORCID will be created for them. If you already have an ORCID record, please click “Provide Existing ORCID” to allow us to associate your HKU ResearcherPage with your ORCID identifier.

If you prefer to manually create your own ORCID record, you may click on, “Go to ORCID, Manually Create”. After you do so, could you please return to this page, and click on “Provide Existing ORCID”, and input your new ORCID iD there.

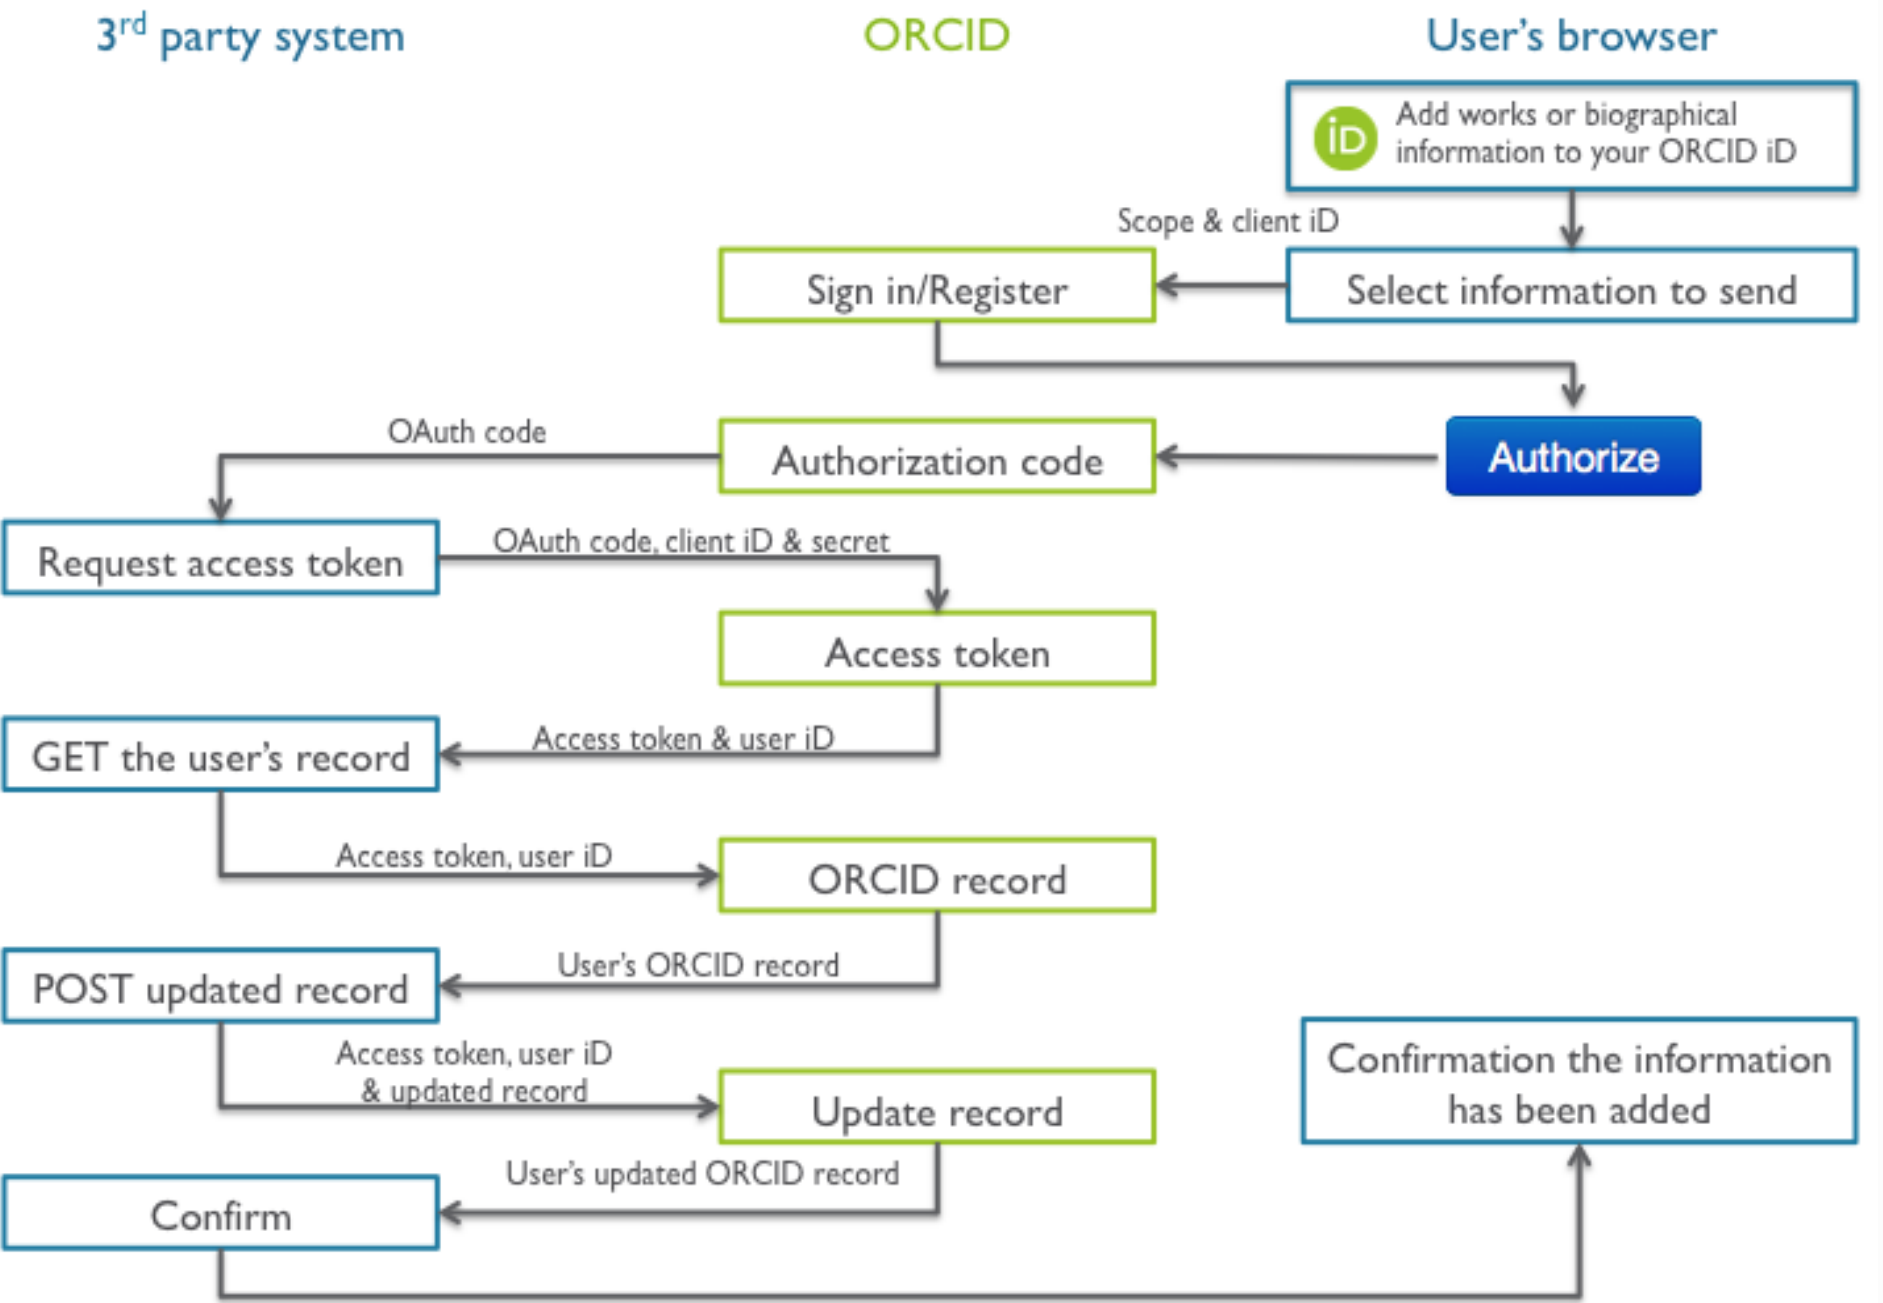

Other HKU faculty and students wishing an ORCID record can also go to ORCID and manually create one for themselves.

Please note that publishers have begun asking for ORCID identifiers during the manuscript submission process, and there are several benefits to getting an ORCID iD, which will follow you throughout your scholarly career. For more information visit <http://hub.hku.hk/orcid/about.jsp>.

Abstract

Background. Salvianolic acid B (Sal B) is one of the most bioactive components of *Salvia miltiorrhiza*, a traditional Chinese herbal medicine that has been commonly used for prevention and treatment of cerebrovascular disorders. However, the mechanism responsible for such protective effects remains largely unknown. It has been considered that cerebral endothelium apoptosis caused by reactive oxygen species including hydrogen peroxide (H₂O₂) is implicated in the pathogenesis of cerebrovascular disorders. Methodology and Principal Findings. By examining the effect of Sal B on H₂O₂-induced apoptosis in rat cerebral microvascular endothelial cells (rCMECs), we found that Sal B pretreatment significantly attenuated H₂O₂-induced apoptosis in rCMECs. We next examined the signaling cascade(s) involved in Sal B-mediated anti-apoptotic effects. We showed that H₂O₂ induces rCMECs apoptosis mainly through the PI3K/ERK pathway, since a PI3K inhibitor (LY294002) blocked ERK activation caused by H₂O₂ and a specific inhibitor of MEK (U0126) protected cells from apoptosis. On the other hand, blockage of the PI3K/Akt pathway abrogated the protective effect conferred by Sal B and potentated H₂O₂-induced apoptosis, suggesting that Sal B prevents H₂O₂-induced apoptosis predominantly through the PI3K/Akt (upstream of ERK) pathway. Significance. Our findings provide the first evidence that H₂O₂ induces rCMECs apoptosis via the PI3K/MEK/ERK pathway and that Sal B protects rCMECs against H₂O₂-induced apoptosis through the PI3K/Akt/Raf/MEK/ERK pathway. © 2007 Liu et al.

➔ Dspace - CRIS

- Funded by HKU Office of Knowledge Exchange (KEO)
 - All new Hub features ➔ Dspace community
 - ➔ Rel. 3.0 and future releases
 - Looking for interested collaborators, testers & adopters
 - ➔ <http://cilea.github.com/dspace-cris/index.html>
- 项目由港大知识交流办公室资助
 - 新功能由Dspace提供
 - 3.0及最新版更多案例
 - <http://cilea.github.com/dspace-cris/index.html>

Final thoughts

- Open, non-profit, community driven organization
- It's free!
- You control privacy
- Maintain a single identifier that connects with other systems
- Get credit for ALL of your research
- iD follows you throughout your career
- Less time (re)entering data
- More time available to conduct research
